

# Subject Index

## A

Acetabular cartilage, 214  
A-scan system, 16

## B

Bladder, 31  
Bone,  
    bending tests on, 149  
    biological factors of, 150  
    compressive tests on, 148  
    creep and stress in, 167  
    fatigue properties of, 168  
    impact strength of, 169  
    major constituents of, 141  
    microstructure of, 141, 171  
    mineralization of, 193  
    models of, 184  
    non-destructive tests on, 176  
    shear tests on, 149  
    tensile properties of, 178  
    tensile tests on, 147  
    torsion tests on, 150  
    types of, 142  
Breast, 31  
B-scan system, 17

## C

Cancellous bone, 142  
Cartilage, 207, 221  
    mid-zone of, 212  
    deep layers of, 212  
Carotid artery, 30  
Cell and tissue destruction, 1  
Changes in cell tissue, 3  
Collagen fibres, 144, 172, 191  
Compact bone, 142  
    as a three-phase material, 181  
Connective tissue,  
    basic organization, 190  
    fibrous elements of, 191  
    intracellular matrix of, 190  
    mechanical properties of, 215  
Cornea, 194

## D

Detached retina, 11, 33  
Differential diagnosis, 32  
Doppler effect, 14

## E

Echographic representation, 14  
Echokymogram, 30  
    display of organs by, 31  
Elastic fibres, 191  
Elastin, 216  
Electrical activity,  
    extracellular, 82  
    intracellular, 81  
Electrocardiograph, 26  
Enbalming, effects of, 154  
Enzyme balance, 4  
Epoch estimation, 112  
Eyeball axis, 56

## F

Fibrous mycoproteins,  
    mechanical properties of, 213  
Focal lesions, 7  
Focused sound beams, 6

## G

Gonads, 4  
Ground substance, 216  
Gynaecology, 31, 67

## H

Haemorrhages, 33  
Haversian canal, 143  
Heart movement, 30  
High-intensity ultrasound,  
    therapeutic applications of, 5  
    thermal effects of, 7  
    in dentistry, 11  
    in retina surgery, 11

- I
- Image converter method, 14  
 Injury to patient, 64  
 Interfibrillar material, 214  
 Intraocular foreign bodies, 33
- K
- Kidney, 31
- L
- Lacunae, 143  
 Langer's lines, 206  
 Lens of the eye, 56  
 Ligaments, 194, 217  
 Liver, 31  
 Living tissue,  
   mechanical response of, 229  
 Lung, 31
- M
- Menière's Disease,  
   ultrasonic surgery in, 9, 67  
 Microsurgery, 12  
 Mitral Stenosis, 26  
 Mitosis, 3
- N
- Neuron,  
   electrical activity of, 79  
 Neuronal signal, 84  
   additivity of, 85  
   fluctuations in, 85  
   identification of, 87  
   interactions of, 88  
   noise properties of, 86  
   orthogonal representations of, 98  
   properties of, 85  
 Nystagmus, 9
- O
- Obstetrics, 31  
 Off-line separation technique,  
   of Hiltz, 121  
   of Keehn, 125
- P
- Pulse echo techniques, 15
- R
- Reticular fibre, 191
- S
- Sclera, 33  
 Secondary osteone, 143  
 Sector scan, 29  
 Skin, 220  
   biaxial membrane tests on, 240  
   enzyme degradation of, 222  
   histological studies of, 198  
   integument, 196  
   maximum extensibility of, 233  
   stereomicroscopy of, 200  
   stress-relaxation studies of, 241  
   structural changes of, 199  
   torsional deformation of, 234  
   trapezoidal rotational displacements  
   of, 237  
 Skin cancers, 5  
 Skin-fold techniques, 239  
 Skull diameter, 31  
 Spike potential, 79  
 Spike waveforms,  
   analogue filtering of, 109  
   decision boundaries for, 114  
   fluctuations of, 85  
   separation systems for, 116  
 Spleen, 31  
 Stereoscan microscopy, 200  
 Storage,  
   effects of frozen, 153  
   effects of saline, 154
- T
- Tendon, 194, 217  
 Threshold of damage, 1  
 Tropocollagen, 193
- Osmotic equilibrium, 4
- Ophthalmology,  
 ultrasonic diagnosis in, 32
- On-line separation system, 108  
 of Glaser and Marks, 108  
 of Simon, 119

## U

Ultrasonic cleaning, 12  
Ultrasonic diagnosis,  
  in cardiology, 26  
  injury in, 64  
  in ophthalmology, 32, 67  
  in the eyeball, 34  
  in the Orbit, 58  
  with continuous waves, 13  
  with pulse echo techniques, 15  
Ultrasonic therapy,  
  Neurophysiological, 67  
  Neurosurgical, 7, 9, 67  
Ultrasound,  
  biochemical effects of, 3, 8

  mechanical effects of, 2  
  modes of action of, 2  
  thixotropic effects, 8

## V

Variation of bones,  
  between bones, 160  
  with one bone, 159  
  with sex, 161  
  with direction, 162  
Vertigo, 9

## W

Wound healing, 193
