

## SUBJECT INDEX

### A

- Acetazolamide, cholera toxin effects and, 245
- Acetone  
*Cl. perfringens* lecithinase and, 120  
collagenase and, 133
- Acetylcholine  
botulinum toxin and, 45-46, 61, 62, 99  
release, tetanus toxin and, 97, 98, 99
- Acetylcholinesterase, tetanus toxin and, 98
- Actinomyces streptomycini*, proteinase of, 37
- Actinomycin D, cholera toxin effects and, 246
- Adenosine-3',5'-cyclic monophosphate, cholera toxin and, 235-236, 246-247
- Adenosine 5'-monophosphate, histamine sensitivity and, 287
- Adenosine triphosphatase, *Cl. perfringens* toxin and, 142
- Adenyl cyclase, cholera toxin and, 236, 247
- Adrenalectomy, histamine sensitivity and, 288
- Aeration, dysentery toxin production and, 257-258
- Africa, botulism in, 5, 6
- Agar gel, botulinum toxin diffusion in, 19-20
- Agarose A-5m, cholera toxin and, 210
- Age, histamine sensitivity and, 285
- Air, botulinum toxin destruction and, 55
- Alkali, dysentery toxin extraction and, 258, 259
- Aluminum phosphate, botulinum toxin and, 53
- Amino acid(s)  
botulinum toxin composition, type A, 16, 17, 27, 36  
cholera enterotoxin and, 203  
*Cl. perfringens* toxin production and, 113, 114  
*Cl. perfringens*  $\epsilon$ -toxin and, 170-171  
histamine-sensitizing factor and, 283  
2-hydroxy-5-nitrobenzyl bromide and, 44  
*Proteus* neurotoxin and, 341, 342, 343  
requirement by *Cl. botulinum*, 8  
*S. typhimurium* neurotoxin and, 318, 319  
tetanus toxin composition, 80
- Amino groups  
botulinum toxin, 38, 39-40  
toxoiding and, 144-145
- Aminotransferase, botulinum toxin and, 37
- Ammonia, sodium transport and, 242
- Ammonium sulfate  
*B. pertussis* toxin and, 275  
botulinum toxin and, 11, 12, 13, 14, 15, 25, 26, 33, 53  
*Cl. perfringens* toxin and, 119  
cholera mucinase and, 209-210  
collagenase and, 133  
histamine-sensitizing factor and, 282  
hyaluronidase and, 131  
intestinal fluid accumulation and, 201  
*Listeria* hemolysin and, 361  
permeability factor and, 225  
*S. typhimurium* neurotoxin and, 318  
tetanus toxin and, 79
- Anaphylaxis, histamine-sensitizing factor and, 290, 291
- Anas platyrhynchos platyrhynchos*, botulism in, 51
- Antibody, cholera and, 212
- Anticollagenase, effectiveness of, 131
- Antihistamines, histamine sensitization and, 288
- Antihyaluronidase, effectiveness of, 131
- Antitoxin  
*B. pertussis* toxin and, 276, 278  
botulinum toxin and, 15-16, 23, 31, 39, 41, 52-53  
cholera, disease and, 248-249  
cholera enterotoxin and, 214-218  
*Cl. perfringens* infection and, 140, 141  
*Cl. perfringens*  $\epsilon$ -toxin and, 171  
dysentery toxin and, 267-268  
permeability factor, 222  
titration of, 228-230  
tetanus toxin symptoms and, 100

- Arginine, *Cl. perfringens* toxin production and, 113, 114
- Ascorbate  
adrenal, *B. pertussis* vaccine and, 288
- Asparagine, tetanus toxin and, 84
- Aspartate, tetanus toxin and, 84
- Aspergillus oryzae*, proteinase of, 37
- Aspergillus terricola*, proteinase of, 37
- Aspirin, histamine sensitivity and, 286
- Autolysis  
botulinum toxin release and, 57-59  
dysentery toxin production and, 258  
histamine-sensitizing factor and, 281, 284  
*Proteus* neurotoxins and, 339, 340  
*S. typhimurium* neurotoxin and, 305-307  
tetanus toxin production and, 76, 77-78, 84-85
- Azocoll method, *Cl. perfringens* toxin assay and, 183, 184
- B**
- Bacillus anthracis* toxin, detection of, 360
- Bacillus megaterium*, toxin production by, 304
- Bacillus melitensis*, cytotoxic substance from, 315
- Bacillus mesentericus*, toxin production by, 304
- Bacillus subtilis*, glutamine transferase of, 37
- Bacteriocins, neurotoxins and, 346
- Bacteriophage, dysentery toxin release and, 261, 266
- Birds, botulism in, 2-3, 5, 6
- Bisulfite, lecithinase and, 123
- Blood pressure, *Cl. perfringens* toxins and, 173, 174
- Bordetella bronchiseptica*, toxin of, 274
- Bordetella parapertussis*, toxin of, 274
- Bordetella pertussis*, see also Whooping cough  
antigens of, 272  
heat-labile toxin  
immunology, 278-279  
mode of action, 277-278  
nature, 276  
pathogenesis, 279-280  
production and purification, 274-275  
synthesis, 276-277  
toxicity, 273  
histamine-sensitizing factor  
immunology, 289-290  
mode of action, 284-289  
nature, 282-283  
pathogenesis, 290-294  
production and purification, 281-282  
synthesis, 283-284  
toxicity, 280-281  
history of, 271-272
- Botulism, see also *Clostridium botulinum*  
causative agent, identification of, 7-9  
as disease, 1-3, 49-52  
history of, 4-6  
incidence in humans, 3
- Bradykinin, histamine-sensitizing factor and, 290
- Brain  
botulinum toxin and, 47  
tetanus toxin fixation by, 87-88
- British Isles, botulism in, 3
- Brucella*, cytotoxic substance from, 315
- Bursting factor, *Cl. perfringens* toxin, 112
- C**
- Cadmium salts, tetanus toxin and, 77
- Calcium  
*Cl. perfringens* lecithinase and, 122, 123, 125, 127  
transport, botulinum toxin and, 48
- Calcium chloride  
*B. pertussis* toxin and, 275  
botulinum toxin and, 9-10, 12, 13, 15, 33, 53
- Calcium phosphate  
collagenase and, 133  
dysentery toxin purification and, 259
- Calves, enterotoxemia of, 179, 180
- Canada, botulism in, 3, 6
- Carbohydrate  
cholera enterotoxin and, 203  
metabolism, listeriosis and, 358, 368
- Carbonic anhydrase  
inhibitor, cholera toxin and, 245
- Carboxymethylcellulose, *Cl. perfringens* toxin and, 119, 123, 169
- Casamino acids  
cholera toxins and, 209-210  
permeability factor production and, 224
- Cat, tetanus toxin and, 71, 72
- Catatonia, *E. coli* exotoxin and, 302-303

- Catecholamine(s)  
 excretion, tetanus and, 102  
 histamine sensitization and, 288-289, 293
- Cattle  
 botulism in, 3, 5, 6  
 enterotoxemia of, 182
- Cell membranes, *Cl. perfringens* toxin and, 138
- Cell walls, histamine-sensitizing factor and, 281
- Ceramide, structure of, 89
- Cerebrosides  
 lysolecithin and, 126  
 structure of, 89  
 tetanus toxin fixation and, 88, 90, 92
- Chloride ions, cholera toxin and, 245, 246-247
- $\rho$ -Chloromercuribenzoate  
 botulinum toxin and, 38, 44-45  
 tetanus toxin and, 79
- Cholera, *see also Vibrio cholerae*  
 animal models, 196  
 cause of death, 189  
 pathophysiology and morbid anatomy, 191-195  
 prevention of, 250-251  
 resistance to, 212, 213, 214
- Cholesterol  
*Cl. perfringens*  $\Theta$ -toxin and, 173  
 $\Theta$ -hemolysin and, 129  
*Listeria* hemolysin and, 362, 364, 366, 368
- Choline acetylase, tetanus toxin and, 86
- Cholinesterase  
 botulinum toxin and, 46, 61  
 tetanus toxin and, 86
- Chymotrypsin, botulinum toxin and, 37
- Clostridium botulinum*, *see also* Botulism  
 amino acid requirements, 8  
 growth in animal body, 50-52  
 hemagglutinins of, 16, 18, 19-20, 21, 23-24, 26, 28, 30-33  
 lysis, toxin and, 57-59  
 media for, 7-9, 10  
 spores, toxin of, 28-30  
 types, 5  
 characteristics of, 2, 6  
 vitamin requirements, 8, 10
- Clostridium botulinum* toxin  
 activation of, 33-36  
 as antigen, 52-55  
 chemical and physical agents and, 55-57  
 dissociation of, 18, 19, 31  
 laboratory detection of, 60-61  
 lethal dose, 1  
 mode of action, 48-49  
 nature of, 57-59  
 properties of, 11  
 proteolytic enzymes and, 37  
 role in bacterium, 59-60  
 site of action, 45-47, 99  
 toxicity, specific chemical groups and, 37-45  
 type A  
 nature of, 15-24, 26-28  
 purification of, 9-12  
 type B  
 nature of, 25-26  
 purification of, 12  
 type C  
 nature of, 24-25, 32  
 purification of, 13-14  
 type Ca  
 purification of, 13  
 type C $\beta$   
 purification of, 12-13  
 type D  
 purification of, 14  
 type E  
 activation of, 33-36  
 nature of, 25-26  
 purification of, 14-15
- Clostridium centrosporogenes*, lecithinase, 121
- Clostridium chauvaei*, lecithinase, 121
- Clostridium hemolyticum*, lecithinase, 121
- Clostridium histolyticum*, collagenase of, 133
- Clostridium oedematiens*, lecithinase of, 121
- Clostridium oedematiens*, toxin, nervous tissue and, 87
- Clostridium perfringens*, *see also* Gas gangrene  
 cells, toxin components in, 116-117  
 other antigens of, 160  
 pathogenesis, 178-182  
 and antigens, 161-164  
 types, 159-160  
 toxins produced, 160-164

- Clostridium perfringens*  $\lambda$ -antigen, nature of, 160, 176
- Clostridium perfringens*  $\mu$ -antigen, nature of, 160, 176-177  
purification of, 169
- Clostridium perfringens*  $\nu$ -antigen, nature of, 160  
production of, 161
- Clostridium perfringens* toxin(s)  
assay, 164  
  hemolytic types, 183  
  major lethal toxins, 183  
   $\kappa$ -toxin, 183-184  
   $\lambda$ -antigen, 184  
   $\mu$ -antigen, 184  
immunology of, 177-178  
production  
  factors involved, 167-168  
  general, 166
- Clostridium perfringens*  $\beta$ -toxin,  
action of, 173-174  
loss of, 162, 163  
toxicity of, 164
- Clostridium perfringens*  $\gamma$ -toxin, production of, 161-162
- Clostridium perfringens*  $\delta$ -toxin  
action of, 174-175  
nature of, 160  
toxicity of, 165
- Clostridium perfringens*  $\epsilon$ -toxin  
action of, 174-175  
formaldehyde and, 177  
loss of, 162  
nature of, 170-172  
purification of, 168-169  
toxicity of, 164-165
- Clostridium perfringens*  $\eta$ -toxin, production of, 162
- Clostridium perfringens*  $\theta$ -toxin  
action of, 174, 176  
nature of, 160, 172-173  
purification of, 169  
toxicity of, 165-166
- Clostridium perfringens*  $\iota$ -toxin  
action of, 174, 175  
activation of, 172  
toxicity of, 165
- Clostridium perfringens*  $\kappa$ -toxin  
action of, 174, 176  
nature of, 160  
purification of, 169  
toxicity of, 166
- Clostridium perfringens* type A toxin  
components of, 111  
detoxification of, 143-146  
mechanism of action, 137-142  
nature of, 111-112  
production, 112-115  
  cells, 116-117  
  medium, 115-116  
purification of, 117-120
- Clostridium sordellii*, lecithinase, 121, 122
- Clostridium sporogenes*, lecithinase, 121
- Clostridium tertium*, lecithinase, 121
- Clostridium tetani*, pathogenesis, 104-105
- Clostridium tetani* toxin,  
central action of, 94-97  
crude, nonspasmogenic fraction, 98-99  
historical, 69-70  
immunology and immunochemistry, 102-104  
minimum lethal dose, 72-73  
  route of administration and, 72  
mode of action, 85-86  
  molecular level, 86-92  
  physiological level, 92-102  
nature of, 79-82  
peripheral actions of, 97-102  
production of, 75-76  
purification  
  autolyzed culture filtrates, 77-78  
  extraction of cells, 78-79  
purified, properties of, 74, 75  
spread in body, 93-94  
synthesis of, 82-85  
toxicity  
  assay of, 71-74  
  factors affecting, 70-71  
  purified toxin, 74
- Clostridium tetani* toxoid, nervous tissue and, 87, 88
- Clostridium welchii* toxin(s), nervous tissue and, 87
- Cobalt  
  *Cl. perfringens* toxin production and, 114  
  lecithinase and, 122
- Collagenase  
  clostridial, 160, 176  
  *Cl. perfringens* toxin, 111, 138  
  cells and, 117  
  production of, 115

properties of, 132-134  
 separation of, 118, 119  
 Collagen paper, *Cl. perfringens* toxin  
 assay and, 183  
 Complement fixation, botulinum toxin  
 and, 60  
 Contracture, tetanus and, 97  
 Cortisone, histamine sensitivity and, 288  
 Creatine phosphokinase  
 plasma, *Listeria* hemolysin and, 368  
 Crystallization, tetanus toxin, 77  
 Curare  
 effects, strychnine and, 95  
 Cycloheximide, cholera toxin effects and,  
 245-246  
 Cysteine  
 botulinum toxin and, 44-45  
 $\theta$ -hemolysin and, 129  
 lecithinase and, 123, 124, 125, 146  
*Listeria* hemolysin and, 364  
 tetanus toxin and, 81  
 Cystine, *Cl. perfringens* toxin production  
 and, 113, 114

## D

Darmbrand, *Cl. perfringens* toxin and,  
 181-182  
 Death time assay, tetanus toxin, 73  
 Denmark, botulism in, 3, 6  
 Deoxycholate, histamine-sensitizing factor  
 release and, 281, 282, 283  
 Deoxyribonuclease  
 clostridial, 160  
*Cl. perfringens* toxin, 111, 136-137, 138  
 Detergents, botulinum toxin and, 20  
 Dextran sulfate, permeability factor and,  
 225-226, 239  
 Dextrin, *Cl. perfringens* toxin production  
 and, 112, 167, 168  
 Diabetes, histamine sensitivity and, 293  
 Dialysis, dysentery toxin purification and,  
 259  
 Dialysis cultures, botulinum toxin pro-  
 duction and, 7-8, 13, 14  
 Dibenzylamine, histamine sensitization and,  
 288  
 Dichloroisoproterenol, histamine sensitiv-  
 ity and, 288-289  
 Diet  
*Cl. perfringens* enterotoxemias and,

178, 180, 181, 182  
 response to cholera enterotoxin and,  
 200  
 Diethylaminoethyl cellulose  
*B. pertussis* toxin and, 275  
 botulinum toxin and, 15, 19-20, 25,  
 26, 31, 33, 35-36  
 cholera and, 210  
*Cl. perfringens* toxin and, 119, 168, 169  
 collagenase and, 133  
 deoxyribonuclease and, 137  
 permeability factor and, 225  
 tetanus toxin and, 77, 78, 79  
 Diethylaminoethyl Sephadex  
 botulinum toxin and, 21, 22  
 cholera enterotoxin and, 202  
 Diisopropylfluorophosphate,  
*Cl. perfringens* lecithinase and, 124  
 Diphtheria toxin, tetanus toxin fixation  
 and, 87  
 Disulfide bridges, tetanus toxin and, 79,  
 81  
 Dog  
 cholera enterotoxin and, 211-214  
 tetanus toxin and, 71, 72  
 Duodenum, cholera enterotoxin and, 201,  
 214  
 Dysentery  
 Shiga, symptoms, 255

## E

ECTEOA cellulose, *Cl. perfringens*  
 toxin and, 119  
 Edema, *Cl. perfringens* toxin and, 112,  
 138, 139  
 Egg yolk, *Cl. perfringens* toxin  
 production and, 112  
 Electrocardiograms, *Listeria* hemolysin  
 and, 369-373  
 Electrophoresis, *see also* Immunoelectro-  
 phoresis  
 botulinum toxin and, 21, 25, 34  
*Cl. perfringens* toxin and, 118, 119,  
 124, 145  
 collagenase and, 133  
 histamine-sensitizing factor and, 282  
*Proteus* neurotoxin and, 343-344  
 tetanus toxin, 77, 79  
 Encephalopathy, *B. pertussis* toxins and,  
 279-280, 290, 291  
 Endotoxin, cholera toxin and, 209

- Enterotoxemias, *Cl. perfringens* toxins  
and, 163, 175, 178-180, 182
- Enzymes  
levels, listeriosis and, 358-359
- Epinephrine  
*Listeria* hemolysin and, 366  
release, histamine sensitivity and, 286,  
293
- Epithelium  
denudation, cholera and, 194-195
- Erythrocytes, *Cl. perfringens*  
 $\theta$ -hemolysin effect, species and, 128, 129  
lecithinase effect, species and, 129  
phospholipids, species and, 126
- Escherichia coli*, infections, 302-303, 332,  
353
- Escherichia coli* neurotoxin(s)  
chemical structure and toxicity, 320-  
322  
historical, 301-304  
*S. typhimurium* neurotoxin and,  
317-318  
serological specificity, 322-326  
strains isolated from urine, 326-327,  
328, 331-333
- Ethanol  
*B. pertussis* toxin and, 275  
botulinum toxin and, 12, 13, 15, 33, 53  
hyaluronidase and, 131
- Ethylene chlorohydrin, lecithinase and,  
124
- Ethylenediaminetetraacetate  
lecithinase and, 122, 125, 127, 141, 146  
tetanus toxin and, 78
- Evans blue, histamine sensitivity and,  
293-294
- Exotoxins, nature of, 197
- F**
- Fatality rate, tetanus, 104
- Fatty acid(s), permeability factor and,  
226
- Fatty dystrophy, *Cl. perfringens* toxin  
and, 139, 140
- Ferritin, *Listeria* infection and, 376
- Fibrinolysin, *Cl. perfringens* toxin, 111
- Ficin, botulinum toxin and, 37
- Flocculation, botulinum toxin and, 52-53
- Fluid  
exchange, cholera and, 242-243, 246
- Fluorescence, botulinum toxin, 43
- Foals, enterotoxemia of, 179
- Food poisoning, *Cl. perfringens* toxins  
and, 161, 163
- Formaldehyde  
*B. pertussis* toxin and, 276  
botulinum toxin and, 52-53  
cholera enterotoxin and, 206, 217-218  
*Cl. perfringens* toxins and, 143-145,  
177-178  
histamine-sensitizing factor and, 282  
*S. typhimurium* neurotoxin and, 308  
tetanus toxin and, 103
- Formamide, histamine-sensitizing factor  
extraction and, 281
- Fowl, necrotic enteritis of, 181-182
- France, botulism in, 3, 6
- Freund's adjuvant, botulinum toxoid and,  
54
- Frog, tetanus toxin and, 70, 87, 92
- Frog skin  
sodium transport, inhibition of, 242
- G**
- Gangliosides  
structure of, 89  
tetanus toxin fixation by, 88-92, 105  
various toxins and, 88, 90
- Gas gangrene, *see also Clostridium*  
*perfringens*  
active immunization against, 146-149  
*Cl. perfringens* toxins and, 161, 163  
hyaluronidase and, 130  
lecithinase and, 138  
prophylaxis and treatment, 109-110
- Gastric juice, botulinum toxin and, 37,  
56
- Gelatin  
botulinum toxin toxicity and, 56  
*Cl. perfringens* collagenase and, 132  
tetanus toxin dilution and, 70
- Gelatin-agar plate method, *Cl. perfringens*  
toxin assay and, 184
- Germany, botulism in, 3
- Gluconeogenesis, listeriosis and, 358, 368
- Glucosamine, *S. typhimurium* toxins and,  
318, 319
- Glucose  
absorption, cholera and, 242, 243  
*B. pertussis* toxin and, 276  
botulinum toxin production and, 7  
perfusion, cholera and, 194, 214

- uptake, histamine-sensitizing factor and, 294  
 utilization, *Cl. perfringens*, 113, 115
- $\beta$ -Glucuronidase  
 plasma, *Listeria* hemolysin and, 364, 366-367
- Glutamate  
*Cl. perfringens* toxin production and, 113  
 tetanus toxin production and, 82, 83-85, 103-104
- Glutamine, tetanus toxin production and, 83, 84
- Glutamine transferase, botulinum toxin and, 37
- Glutathione, lecithinase and, 123
- Glycerophosphorylcholine, *Cl. perfringens* toxin production and, 112
- Glycine  
 effects, strychnine and, 95-96
- Glycogen, *Cl. perfringens* toxin production and, 167

   histamine-sensitizing factor and, 283,  
     290  
   tetanus toxin extraction by, 78-79  
 Sodium dodecyl sulfate  
   *Cl. perfringens* lecithinase and, 122  
   histamine-sensitizing factor and, 283  
 Sodium hexametaphosphate,  
   *Cl. perfringens* toxin and, 119  
 South America, botulism in, 6  
 Soviet Union, botulism in, 3, 6  
 Species, tetanus toxin toxicity and, 70-71  
 Sphingomyelin  
   lecithinase and, 126  
   occurrence in erythrocytes, 126  
 Spinal cord, tetanus toxin and, 88, 93-94  
 Spleen, *B. pertussis* toxin and, 277, 278,  
   292  
 Spores, lecithinase in, 116  
 Sporulation, toxigenicity and, 60  
 Staphylococcus toxin, nervous tissue and,  
   87  
 Starch, *Cl. perfringens* toxin production  
   and, 113, 167  
*Sterne albifrons antillarum*, botulism in,  
   51  
 Stool  
   composition, cholera and, 192-193, 195,  
     248  
 Streptolysin O, heart and, 374-375  
 Stress, histamine sensitivity and, 286, 290  
 Struck, *Cl. perfringens* toxin and, 179-180  
 Strychnine  
   gangliosides and, 90  
   tetanus toxin and, 94-96  
 Succinoxidase, *Cl. perfringens* toxin and,  
   141-142  
 Sucrose, *B. pertussis* toxin and, 276  
 Sulfhydryl groups  
   *Cl. perfringens* lecithinase and, 124  
   *Cl. perfringens*  $\theta$  toxin and, 173  
   tetanus toxin, 79  
 Sunlight, botulinum toxin and, 55  
 Sweden, botulism in, 3, 6  
 Sympathetic nervous system, tetanus and,  
   102  
 Synaptic ganglia, botulinum toxin and,  
   45  
 Synaptosomes, tetanus toxin and, 88
