

SUBJECT INDEX

A

- Acer pseudoplatanus*, 125
- Acetobacter xylinum*, 142
- Actin
 - F, 22, 80
 - G, 21, 80
- Actinosphaerium*, 66
 - after changes in hydrostatic pressure, 70
 - after exposure to 4°C, 73
 - cortex of, 78
 - during compression, 71
- Actinosphaerium nucleofilum*, 67
- Adhesive factor, 161
- Aldolase, 16
- Ambient tonicity
 - effects on cell behavior of changes in, 238 et seq.
- Amblyopia, 320
- Ambystoma*, 197, 253, 260, 264, 273
- Amniocardiac vesicles, 217
- Angiograms, 308
- Anterior commissures, 308, 309
- Anthurium*, 140
- Antimitotic agents, 69
- Anurans
 - lateral motor column development in, 274
 - periphero-central relationships in, 286
- Apical ectodermal ridge, 191
- Apomyoglobin, 8
- Arbacia punctulata*, 74
- Asymptomatic agenesis
 - explanatory factors for, 319
- ATP, 163
- ATPase, 163
- ATPase-active globule, 24
- Auditory cues for recognition of the species-specific maternal following-call, 266
- Autonomous differentiation vs. learning, 263
- Axoneme, 66

- assembly of, 90
- ciliary, 92
- flagellary, 92
- Axons, 252
- Axopodia, 66
 - beading of, 69, 71
 - effects of hydrostatic pressure on, 69
 - effects of low temperature on, 69
- Axopodium
 - longitudinal section of, 68
 - re-forming, 72
 - transverse section of, 74

B

- Bacteria
 - organization of cell envelope of gram-negative, 109
- Bacterial flagellins, 22
- Z-bands, 219, 224
- Basal body, 92, 95, 97
- % BC
 - see beating cells
- Beak clapping movements, 256
- Beating cells
 - % of, 231, 232, 233, 236
 - percentage of in hearts of different ages, 233
- Bilayers
 - comparison with biological membranes, 107
 - synthetic, 107
- Bimodal boundary system in equilibrium constant, 40
- Biochemical organization of cytoplasmic membranes, 103
- Bioelectrical activity, 253
 - and synapse formation, 255
 - endogenous, 255
- Biological membranes
 - comparison with bilayers, 107
- Blastocoel, 76, 96
- Blastodisc, 211
- Blastomeres, 171, 172

- Blastula, 94
 Blood platelets, 76
Bombinator, 272
 Boutons, 254
 Bovine pancreatic ribonuclease, 5, 11
 limited cleavage, 13
 Bovine RNase-S
 three-dimensional structure of, 11
 Brain
 gnostic functions of, 310
 higher functions of, 310
 Brain
 nuclei, 252
 Brown fat, 152
Bufo, 273, 296
Bufo marinus, 277
- C
- Ca²⁺, 8, 159, 160, 161, 163, 164, 167, 169, 173, 232
 action on junctional membrane permeability, 162
 junctional membrane permeability dependence on, 159, 160
 sequestration, 174
 Calcium ions
 see Ca²⁺
 Cancer cells
 alterations in communication, 167
 Carboxypeptidase B, 184
 Cardiac proteins, 212
 Cardiogenic crescent, 212, 213
 Cardiogenic splanchnic mesoderm, 218
 Cartilage, 188
 Cartilage formation, 189
 Caudal sheath of spermatids, 93
Caulerpa, 132
 Cell adhesion, 167
 Cell chain
 equivalent circuit of, 156
 Cell column, 252
 Cell envelope
 organization of in gram-negative bacteria, 109
 Cell injury and junctional membrane sealing, 161
 Cell junction
 communication through, 151
 elements of, 152
 for growth control, 151
 role in control of growth, 166
 relationship to cell size, 282
 relationship to developmental stage in the lateral motor column, 282
 Cell population size, 177, 178
 signal substances for, 178
 α -Cells
 of the pancreas, 184
 β -Cells, 185
 of the pancreas, 184
 F-cells, 227, 234, 237
 M-cells, 218, 228, 232, 234, 236, 237
 Cell size
 relationship to cell number, 282
 relationship to stage, 283
 Cell sorting, 193
 Cell-to-cell diffusion, 157
 Cell-to-cell flow, 166
 of larger particles, 154
 of small ions, 153
 Cell walls
 emergence of pattern in, 118
 types of patterning in, 119
 Cellular metabolism
 dependence of junctional permeability on, 159
 Cellulose microfibrils, 119, 120, 124
 Centriole, 95, 97
 Cesium, 108
Chaetomorpha, 142
 ChE, 254
 Chemo-affinity, 252
 Chick, 65
 heart formation, 216
 periphero-central relationships, 273
 Chick embryo
 origins of integrated behavior, 260
 Chick spermatids
 array of microtubules encircling the nucleus, 65
 Chicken, 184
 Chimeric cartilage, 196, 197

- Chironomus*
 salivary gland, 162, 163, 176
- Chlorella*, 143
- Cholinesterase
 see ChE
- Chloretone, 263
- Chondrocranium, 192
- Chondrogenesis, 185
- Chondrogenic tissue, 189
 lability of, 190
- Chondroitin sulfate, 185, 188, 202
 A, 198
 B, 186
 synthesis, 185
- Chondromucoprotein, 185
- Chromatolysis, 298
- Chymotrypsin, 11, 12, 16, 184
- α -Chymotrypsin, 21
- Chymotrypsinogen, 13
- Cicada, 264
- Cilia, 64
- Ciliary axoneme, 92
- Ciliates, 65
- Cilium, 92
- Cochlear nuclei, 266
- Colchicine, 71, 79, 82, 95, 127, 129
- Coleoptile, 125
- Coleus*, 125, 131
- Collagen conformation, 22
- Collagenous connective tissue, 226
- Concentration profile for myosin monomer-polymer equilibrium, 39
- Contact guidance, 252
- Contact inhibition, 169, 179
- Contraction
 intrinsic rate of, 222
- Control loops, 178
- Conus cells, 211
- Coordination of muscle groups, 256
- Corpus callosum, 307, 309
 agenesis of, 308
 apparatus for testing functions of, 312
 in the human fetus, 308
 total absence of, 308
- Correpressor, 179
- Cortical bundles of microtubules, 91
- Coupling, 171
 all-or-none, 173
- Crayfish axons
 junctions of, 156
- Cross bridges, 23
- Cross bridges and filaments, 23
- Cucurbita maxima*, 134
- Cultured cells
 spontaneous activity of, 230
- Cyanide, 163
- Cyanidium*, 143
- Cyclohexamide, 79
- Cytochrome, 11
- Cytoplasm-wall interface, 123
- Cytoplasmic membranes
 biochemical organization, 103
- Cytoplasmic streaming and wall patterning, 129
- Cytoskeletal and microtubule function, 133
- Cytoskeleton, 144
- D
- D₂O, 76, 78, 79, 80, 86, 87, 88, 96
- Dendrites, 254
- Dermatome, 196
- Deuterated water
 see D₂O
- Developmental aspects of functional adaptations, 165
- Developmental compensation, 317
- Developmental stage
 relationship to cell number in the lateral motor column, 282
- Differential adhesiveness, 219
- Differential adhesivity of cells, 220
- Differentiated state
 stability of the, 235
- Differentiation of pacemaker membrane, 223
- Differentiative state, 209
- Dinitrophenol (DNP), 163
- Disulfide bonds, 2
 number of possible combinations from 2n sulfhydryl groups, 3

- Drosophila*, 156, 197
salivary gland, 151, 154, 155, 157
- E**
- Ectoderm
and mesoderm, reciprocal interaction
between, 191
- Ectodermal cells
distribution of microtubules in, 94
- EEG patterns of embryos, 258
- Elastase, 13
- Electrical coupling, 223
- Electrical resistance, 107
- Eleutherodactylus*, 258, 259, 296
- Eleutherodactylus martinicensis*, 277,
281, 296
- Eleutherodactylus ricordii*, 277, 291
- Elodea*, 131, 145
- Embryonic brain
organ cultures of, 254
- Embryonic cells
establishment of junctional communi-
cation between, 172
emergence of form and function in,
208
- Embryonic heart cells in culture, 225
as pacemakers, 225
- Embryonic motility in amphibians, 259
- Embryonic rat spinal cord
organ cultures of, 254
- Embryonic tissues
junctional communication in, 170
- Embryos
EEG patterns, 258
- Emergence of order in organs, 151
- Emergence of order in tissues, 151
- Endocardial cells, 214
- Endocardial tissue, 226
- Endoplasmic reticulum
see ER
- Endothecium, 122, 125
- Endothelial cells, 226
- Endothelial cell wall, 128
- Endothelial thickenings
effects of colchicine on, 130
- Endothecium
of lily anther, 126
- Endothecium cells, 126
- Enteric bacteria
gram-negative, 108
- Enthalpy change, 56
- Entropy change on self-association of
myosin, 43
- Enthalpy of the polymerization reac-
tion, 42
- Entropy of the polymerization reaction,
42
- Epiblast cells, 211
- Epicardial cells, 218
- Epileptic seizures
transmission of, 310
- Epimycocardial troughs, 218
- Equilibrium constant
bimodal boundary system and, 40
effect of pressure on, 43
effect of temperature on for polymer-
ization of myosin, 43
pressure dependence of, 54
temperature dependence of, 42
- Equilibrium between polymer and
tubule monomer, 80
- ER, 134
association with plasmalemma, 139
role of in locating aperture sites of
pollen grains, 137
- Euthyroid tadpole, 286
- Exine, 121, 136
- Exine ontogeny, 137
- Experimental neurogenesis, 251
- Extracellular nuclease
amino acid sequence of, 14
- Eyeball movements, 256
- F**
- Facilitation, 266
- Fibroblasts, 169, 218
junctions of, 156
- Fibroblastic cells
see F-cells
- Fibroelastic tissue, 226
- Fibrous proteins
self-association reactions in, 21

- Filaments and cross bridges, 23
 Final common paths, 262
 Flagella, 64, 77, 92
 Flagellary axoneme, 92
 Flagellin, 92
 Flagellum, 92
 Fluorescein, 155
 Folding of proteins, 3
 Formation of salt linkages, 56
 Fowl spermatid nucleus, 92
 Frog tadpoles, 265
 Functional activity
 beginnings of, 253
Fundulus, 220
- G**
- G₁ phase, 209, 235, 238
 G₂ phase, 209, 238
 β -Galactosidase, 16
 Genetic information
 effects of interruption, 12
 modification of, 12
 γ -Globulin, 4, 6, 9, 16
 Gnostic functions of the brain, 310
 Gradient of rhythmicity, 224
 Gradient phenomena, 179
 Growth cone, 252
 Growth control
 implications of communication
 through junctions, 151
 Growth inhibition at high densities, 238
 Growth regulation
 for junctional models, 177
- H**
- Hatching behavior
 sensory guidance of, 265
 Higher plants
 emergence of pattern in cell walls of,
 118
 Hippocampal commissures, 308, 309
 Histogenesis
 relation to morphogenesis, 200
 Histogenetically equivalent cells
 segregation of, 197
 Horse sera, 232
- Heart
 pacemaker activity, 223
 Heart cells
 distribution of in culture media, 239,
 240, 242
 intercellular contact among, 238
 morphology, 226
 properties of in culture, 224
 tracings of after culture in media
 with different tonicity, 241
 Heart-forming mesoderm, 210
 Heart function
 initiation of, 221
 Heart tubulation, 215
 HeLa cells, 236
 Heliozoan axopodia, 64
 α -Helix, 22
Helleborus foetidus, 137, 140, 145
 Hemangioblasts, 218
 Heme, 8
 Hemicelluloses, 119
 Hemispherectomy, 318
 Hemispheric disconnection syndrome,
 310
 Hemoglobin, 16
 Higher functions of the brain, 310
Hydra, 220
 Hydrophobic bonds, 57, 58
 calculated number of, 58
 Hydrophobic residues, 56
 Hydrophobic side chains, 8
 Hydrostatic pressure effects on axo-
 podia, 69
Hyla punctatissima, 277, 293
 Hyperplastic response, 273
 Hypophysectomy, 281
 Hypoplastic response, 273
- I**
- Incomplete tubules, 82
 Incorporation of cellulose precursors,
 143
 Inducer, 179
 Inducer cells, 175
 Initiating sites, 95
 Insect flight muscle, 24
 Insulin, 12, 13, 16, 21, 22, 184

- Integrated behavior
 origins of, 251, 259
 origins of, in chick embryo, 260
 role of sensory input in development of, 263
 Integration of movements, 256
 Intelligence test, 307
 Interhemispheric functions, 311
 Intine, 137
 Ionic bonds, 57, 58
 calculated number of, 58
 Ionic residues, 56
 Iontophoresis, 162
Ipomoea caerulea, 140
 Isolated tubule monomers, 82
 Isotopic sulfate
 binding of, 186
- J
- Junction formation
 and permeability changes, 164
 Junctional communication, 154
 causes of interruption of, 164
 functional adaptation of, 165
 genesis of, 156
 in cancerous liver cells, 168
 in embryonic tissues, 170
 in liver cells, 168
 interruption of, 171
 interruption of by lithium, 176
 Junctional coupling
 and patterns of differentiation, 173
 Junctional elements, 152
 Junctional membranes, 152
 dependence of permeability on Ca^{++} , 159, 160
 permeability dependence on perijunctional insulation, 159, 161
 sealing and cell injury, 161
 Junctional models
 for growth regulation, 177
 Junctional permeability
 dependence on cellular metabolism, 159, 162
 factors controlling, 156
 Junctional uncoupling, 163
 and patterns of differentiation, 173
 by Li^+ , 176
 Junctional unit, 152
 Junctions
 in squid embryos, 156
 of crayfish axons, 156
 of fibroblasts, 156
 size range of particles permeating, 156
Juniperus, 124
- K
- K^+ , 108, 232, 239
 Keratosulfate, 186
 Kinetochores, 97
- L
- Labeled implants, 211, 212
 α -Lactalbumin, 11
 Latent pacemaker, 231
 Lateral motor column
 see LMC
 Learning vs. autonomous differentiation, 263
 Leg bud extirpations, 273
 Lens primordia, 65
 Lens rudiment, 64
 Li^+ , 176
 junctional uncoupling by, 176
 vegetalizing effect of, 176
 Lignin, 120
Lilium longiflorum, 136, 139
 Limb amputation
 excessive cell numbers following, 299
 Limb cartilage, 198
 Limb development, 201
 Limb development stages in, 187
 Limb field, 191
 Limb mesoderm, 189
 Limb morphogenesis, 190
 Limb segments
 cell numbers in, 279
 grafts of, 279
 Limb type characteristics, 192
 Limited trypsin cleavage, 14
 Lipase, 184

- Lipopolysaccharide, 111
 Lipopolysaccharide-bound O-antigen, 114
 Lipopolysaccharide of *Salmonella* cell envelope, 108
 Lipopolysaccharide rhamnose, 112, 113
 Lithium
 interruption of junctional communication by, 176
 Liver, 152, 161
 Liver cancer, 167
 LMC, 272, 273, 274
 capacities of intrinsic differentiation, 278
 cell migration into, 291
 cell numbers in *Pseudacris nigrita*, 288
 cells, average sizes in *Rana pipiens*, 295
 cytodifferentiation in, 297
 degeneration in, 289
 development in anurans, 274
 development, influence of temperature on, 285
 neuroblasts, 273
 neurogenesis of, 272
 recruitment of cells into, 291
 relationship of cell number and developmental stage, 282
 Lumbosacral lateral motor column cells
 differentiation of, 275
 Lumbosacral motor column cell sizes in *Xenopus laevis*, 298
 Lumbosacral plexus, failure to form on operated side, 274
 Lumbosacral spinal cord
 extirpation of, 257
 Lysine starvation, 109
 Lysozyme, 11
- M
- Macromolecular structures
 self-assembly of, 1
 Magnesium
 see Mg^{2+}
 Maintenance factor, 191
 Mammalian spermatids, 65
 Mannolipid, 106
 Medium
 conditioned, 237
 Membranes
 and wall patterning, 134
 Membrane structure
 models of, 105
 Mesenchyme cells, 95
 Mesoderm
 and ectoderm, reciprocal interaction between, 191
 Metamorphic climax, 293
 Mg^{2+} , 174
 Mice
 enriched environments for, 323
Micrococcus lysodeikticus, 106
 Microspores
 ER distribution in, 135
 wall patterning in, 135
 Microtubules, 127 et seq
 and cytoskeletal function, 133
 and the development of cell form, 64
 array of, encircling the nucleus of chick spermatids, 65
 assembly of, 63
 associated with wall patterning, 124
 chemical composition of, 80
 control of, 84
 cortical bundles of, 91
 defined by morphological criteria, 64
 disassembly of, 80
 distribution and polymer-monomer equilibrium, 96
 distribution in ectodermal cells, 94
 distribution in primary mesenchyme cell, 75
 in a 340 Å tubular unit, 82
 links connecting, 84, 85
 long link connecting (300 Å), 86
 mechanisms of assembly of, 80
 outer doublet, 82, 84
 positions in clusters, 87, 88
 precursor pool of, 79
 proposed model for assembly of, 81
 role in development of cell form, 63

- short link connecting (70 Å), 86
- substructure of, 80
- tangential link, 86
- Microtubule pattern
 - control of, 77
 - nucleating centers in the control of, 92
- Midbody, 97
- Mitochondrial membranes
 - structure of, 114
- Mitotic apparatus, 82
- Mitotic cycle, 209
- Model for biosynthesis
 - of bacterial outer membrane, 110
- Model of bacterial outer membrane, 110
- Model phospholipid-hydrocarbon films, 106
- Modes of adjusting cell numbers, 300
- Molecular weight of myosin polymers, 36
- Monolayer equivalents, 238
- Monomer-dimer-trimer equilibrium, 21
- Monomer-polymer equilibrium
 - effect of hydrostatic pressure on, 46
 - effect of increasing rotor velocity on, 44
 - effect of ionic strength on, 34
 - effect of pH on, 35
- Monomeric myosin, 25
 - length distribution of, 27, 28, 29
- Monomers
 - isolated microtubule, 82
- Morphogenesis
 - relation to histogenesis, 200
- Morphogenetic phases in development, 184
- Morris' tumor, 168
- Morula, 171
- Motility of embryos during development, 253
- Motoneurons, 254

 Polyalanyl-RNase, 10
 Polymerase, 186
 Polymerization reaction
 enthalpy of, 42
 entropy of, 42
 properties of, 58
 Polymer-monomer equilibrium and microtubule distribution, 96
 Polymer system
 self-association reactions in, 21
 Polyoma virus, 169
 Polyproline II conformation, 22
 Porcine proinsulin
 structure of, 15
 Posthatching behavior
 facilitation by self-stimulation, 266
 Potassium
 see K⁺
 Precardiac mesoderm, 215
 mapping of, 210
 regional map of, 214
 Preconal cells, 214
 Precursor pool of microtubule, 79
 Prehatching
 sensory guidance of, 265
 Preston's particles, 143
 Primary mesenchyme, 212
 Primary mesenchyme cell
 distribution of microtubules in, 75
 Primary walls, 119
 Primexines, 135, 137
 Primitive streak, 211
 Probacula, 135, 137, 139, 140
 Procedures for testing cross integration, 316
 Proinsulin, 13, 15
 Proteases, 11
 Proteins
 folding of, 3
 multichained, 12
 oligomeric, 13
 partial specific volume of, 48
 spontaneous formation of the three-dimensional structure of, 1
 Provisional neuromuscular contacts, 254
Pseudacris, 296
Pseudacris nigrata, 287
 cell numbers in the LMC of, 288
 lumbosacral area of the spinal cord of, 292
 Puromycin, 79
- R
- Rabbit-antibovine serum albumin, 6
Rana, 272, 275, 289, 295, 301
Rana pipiens, 272, 274, 275, 276, 278, 280, 285, 286, 290, 291, 293, 294, 298, 299, 300, 301
 average sizes of LMC cells of, 295
Rana sylvatica, 277, 278
Rana temporaria, 276
 Rat, 184
 amino acids sequence of, 11
 enriched environments for, 323
 pancreatic RNase, 11
 Regenerating optic nerves, 264

- Relation between resistances and quality of communication, 153
 Renal tubules, 152
 Repressor, 179
 Retina cells
 regional specification of, 265
 Rhythmical embryonic motility, 257
 Rhythmicity
 gradient of, 224
 Ribonuclease, 6
 RNase, 5
 rat pancreatic, 11
 RNase-E, 13
 RNase-S, 13, 15
 thermodynamic stability of, 5
 RNase-S-protein
 disulfide interchange of, 6
 inactivation of, 6
 RNase-T, 13
 effect of increase on monomer-polymer equilibrium, 44
 effect on myosin-polymer equilibrium, 51
 sedimentation profiles demonstrating the reassociation of monomer upon reduction of, 45
 Rous sarcoma virus, 235
 Rubidium, 108
- S
- Saccinobaculus*, 91
 Safety margins for communication differences, 170
 Salivary gland, 152, 161
Salmonella, 92, 109
Salmonella cell envelope, 108
 lipopolysaccharide of, 108
Salmonella newington, 111
 Salt concentration, effect on myosin \rightleftharpoons polymer equilibrium constant, 40
 Sand dollars, 171
 Satellites, 97
 Sclerotome, 196
 Scrambled ribonuclease, 4
 Sea urchin gastrulae, 65
 Secondary thickening, 125
 Secondary walls, 119
 Sedimentation profiles of myosin polymers, 31, 32, 37
 Selective chemoaffinities, 264
 Self-assembly, 103
 of macromolecular structures, 1
 Self-association reactions in fibrous proteins, 21
Self-stimulation, 258
 Self-sealing capacity, 161
 Sensory epithelia, 152
 Sensory input
 role of in development of integrated behavior, 263
 Septum pellucidum, 309
 S-flexure, 253
 C-shaped tubules, 82
 Sieve plates, 134
Silene pendula, 137, 139
 surface region of a microspore of, 138
 Skin, 152, 161
 Small ions
 cell-to-cell flow of, 153
 Sodium
 see Na⁺
 Sodium fluoride, 212
 Somesthesia, 321
 Specific synaptic connections, 252
 S-peptide, 5
 Spermatids
 caudal sheath of, 93
 Spermatozoa, 64
 Spinal cord explants, 254
 Splanchnic mesoderm
 configuration of, 215
 Sponge cells, 159
 Sponge cell aggregates, 161
 Sponges, 152
 Spontaneous contraction
 environmental effects on, 231
 Spontaneous formation of the three-dimensional structure of proteins, 1
 Spontaneous motility in embryos, 255

- Spontaneous neuronal activity
 definition of, 255
