ACKNOWLEDGMENTS

The authors express their appreciation of the many persons in government service and in other capacities who provided information, suggestions and pertinent publications.

Of those who responded so generously the following persons were especially helpful: Mr. Frank J. Nivert of the Federal Register and Code of Federal Regulations staff; Mr. J. Kenneth Kirk and Mr. Tom Bellis of the Food and Drug Administration; and Mr. R. H. Philbeck, Mr. G. A. Bidelman, and Mrs. Elinore T. Greeley of the U.S. Department of Agriculture.

Dr. Emil M. Mrak, Chancellor, University of California, Davis, California, made proposals of great importance.

Mr. Ashley Sellers of Cummings and Sellers, Attorneys at Law, Washington, D.C., provided very constructive suggestions.

To Mrs. Doris L. Warren, the authors are especially indebted for her outstanding secretarial service and manuscript preparation, and for her effective and steadfast interest in seeing the task through to completion.
